

## NOVA XP METER BOX ISOLATION GATE UPDATE

SeedMaster would like to provide you with 10 Meter Box Isolation Gates free of charge.

Isolation Gates can be used to isolate product flow into a single meter box or all meter boxes on a tank. This can prove helpful when troubleshooting meter operation on a granular product tank that is full of product. To use an isolation gate, remove the service slot bolt as indicated in Figure #1 and insert the Meter Box Isolation Gate into slot. This will isolate product flow to the meter so that granular product can be emptied from the meter box without emptying the entire tank.

**Figure #1**

All 2015 Nova carts will be delivered with 10 Isolation Gates as a standard feature.

We thank you for maintaining your SeedMaster equipment. If you have any questions, please contact your [SeedMaster Certified Dealer](#) directly.
